Capabilities

Aceitnow can output business presentations on laptop, web, or CD-ROM, from a single disk to an unlimited number of disks. We will create a new website or redesign an existing under-performing website and add dynamic interactivity to make the user experience a memorable one. All of our designs build new site architecture, develop new graphical elements, and optimize the user experience and make your site attractive and easy to navigate. Our designs are Formatted for Macintosh and PC and they are Cross-platform and cross-browser compatible.

We can network your office, provide remote access and implement appropriate security protocols and strategies to protect your data.

We can create customized software for our customers and database solutions to store and efficiently access your customer data.
